Understanding Your *Window* Options

An Essential Guide

Windows are one of the first features of your home to be noticed, so it's no surprise that windows add to the curb appeal of your house and property. Whether you're selling your home or simply replacing your windows for your personal comfort and energy savings, we can show you the way.

Start With the Basics

First, decide on whether a contemporary or classic design will best suit the style of your home.

The PVC Advantage

Boasting durability, energy efficiency and resistance to moisture and corrosion, PVC windows are essentially maintenance-free. Vinyl Window Designs' (VWD) multi-chambered profiles are designed for energy savings, extra strength and maximum insulation. VWD's profiles are slim, resulting in maximum light penetration without sacrificing strength. The frame and sash are welded simultaneously for a perfect fit.

“Wood” It Be Practical?

Enjoy the warm and inviting look of wood in a durable uPVC vinyl. Get the look without sacrificing practicality.

Get Insulated with Foam

The frame makes up about 15% of a window. Government recommended foam insulation is offered as an option that can provide dramatic reductions in heat loss.

Zone In for Ultimate Performance

Your window style and glass option decisions can be customized to your specific climate zone and even the direction your home faces. VWD's Solar Gain Low-E Glass provides the benefit of free solar heat gain in winter so you can save on your heating bills.

VWD's Solar Shield Low-E Glass offers the best 'R' values for radiant heat control. It's the glass of choice where cooling costs outweigh heating costs in energy usage, or where summer discomfort from heat build-up is a concern.

A Matter of Preference

The most energy efficient window is the casement. If you're looking for a more traditional look, try a double hung window. You can easily create the feeling of more space in any room by considering a bay or bow window. This option will transform both the interior and exterior of your home.

The Unique Side

Be subtle or bold in your choice of accessories and have fun choosing your grill pattern and color. You may have the option of adding simulated divided lites, depending on the window style you've chosen. Customize the width, profile and color to suit your home.

The Finishing Touch

VWD's Casement folding handles will not interfere with your drapes and blinds. A wide variety of interior and exterior accessories are available to enhance the look and function of your windows. Snap on casings and rosettes are fully washable and can be easily removed when it's time to paint or decorate your walls.

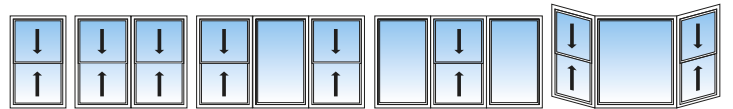

Premium Series Double Hung 210/210BMJ

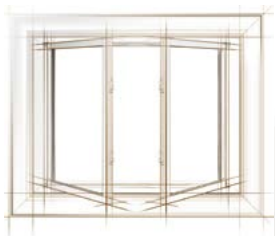

Features and Benefits

- 3 1/4" Frame Fusion Welded Frame and Sashes
- Optional 210BMJ has an Extruded Brickmould and Nailfin

the *Complete* Window Package

From its inception, Vinyl Window Designs has been committed to building the best quality, competitively-priced products - complemented by outstanding customer service. Manufactured in a variety of styles, colors and variations, Vinyl Window Designs is committed to meeting the specific needs of your home.

Our *Quality* Is Your *Assurance*

With decades of experience providing you with state-of-the-art windows, and with a limited lifetime warranty to live up to every day, it is no wonder that VWD takes window design and quality control very seriously.

Our in-house testing facility makes VWD one of a very exclusive group of manufacturers in North America that have invested in verifying the quality of our windows and their components through a rigorous testing program. Our R&D program is based on our ability to test prototypes before they reach your home. If it is made by VWD, it has been tested and proven to perform to VWD and your high standards.

Your windows are tested to NFRC's highest standards as part of our commitment and participation in the NFRC Certified Window Program.

Anyone can offer a lifetime warranty, but at VWD our products earn the right to wear it proudly!
